

León Domingo

Fullstack developer

Fullstack developer and enthusiast of **the WWW** universe for its freedom of movement. Your apps, services and content always availabe from anywhere and any device.

I'm in love with **open-source** projects which give us a great platform to create useful things with a low cost and fully transparent. (Almost) every tool I use is open source (linux, vscode, postgresql, python, and so on) and I (usually) do not like proprietary solutions (oracle, sql server, windows, etc) because of the obligation to adopt another set of private related technologies from the same company (most of the time).

I love **Python** 🐍 and the whole living ecosystem around it. Great work of a lot of people. Great on-line resources and awesome productivity.

I'm also focused on **JavaScript**-related technologies: 📦 **Node**, 🏠 **Vue**, 🦋 **React**, etc, with Python (or not) as the backend.

Testing (and playing with) new technologies, as they come up, is something I like a lot. **Golang**, **Universal JS** apps with SSR or **Blockchain** are areas where I want to get better in the mid term.

Professional experience

Senior Javascript Developer

serquo (Spain)
from **Apr/2020**

- Frontend development in vanilla Javascript (ES2015+, classes, and no framework at all), partially implementing the Webcomponents technology, for a big spanish TV content-provider company on its LATAM market
- Agile flow with Scrum and JIRA tool-set
- Code review & pull requests
- Fully remote

Frontend developer

Capgemini (Spain)
from **Jan/2020** to **Mar/2020**

- Frontend development with React
- Agile flow with Scrum
- Code review & pull requests
- Atlassian suite for team-work (Bitbucket, Jira, Confluence)
- Slack, Zoom, Skype for communication/remote work

Software engineer [freelance]

RIDDLE&CODE (Austria)
from **Feb/2017** to **Dec/2019**

- Software development of solutions based on Blockchain using Python, Flask (HTTP JSON APIs) and IPDB/BigchainDB plus others (Docker, Docker-Compose, ...)
- Frontend with Vue.js and the Flask HTTP/JSON API
- Deployment of different services on AWS servers with Ubuntu machines
- Remote working (Slack + Jira + whereby.com -aka appear.in- / Skype)
- Code review & pull requests

Cofounder / Developer

Codevince (Spain)
from **Oct/2013** to **May/2018**

- Python + PostgreSQL + MongoDB backend development
- HTML5 + CSS3 + JS [Vue.js, Angular]S (1.X), React, ES2015+, lodash, axios, jQuery, etc] frontend development
- Wordpress development (PHP + HTML5 + CSS3 + JS [Vue.js / Angular]S / React], custom themes & plugins)
- NodeJS (with ExpressJS) + MongoDB backend development
- Setting up Linux servers on several cloud providers with Ubuntu machines
- Combinations of the above items...
- Pair programming

Lead developer

Ender Aplicaciones (Spain)
from **Jun/2005** to **Oct/2013**

- Analysis and development of web projects using Turbogears2 (Python + PostgreSQL + jQuery + HTML5 + CSS3)
- Services and application deployment on different cloud providers using Ubuntu
- Pair programming

Education

Computer Science degree

Universidad Politécnica de Madrid
from **1996** to **2001**

Just the period during which I acquired the theoretical foundations that would help me achieve the professional skills of "real life". I came out with no specific knowledge but I was ready to receive what it was coming.
