

León Domingo

Fullstack developer

Fullstack developer and enthusiast of **the WWW** universe for its freedom of movement. Your apps, services and content always availabe from anywhere and any device.

I'm in love with **open-source** projects which give us a great platform to create useful things with a low cost and fully transparent. (Almost) every tool I use is open source (linux, vscode, postgresql, python, and so on) and I (usually) do not like proprietary solutions (oracle, sql server, windows, etc) because of the obligation to adopt another set of private related technologies from the same company (most of the time).

I love **Python** 🐍 and the whole living ecosystem around it. Great work of a lot of people. Great on-line resources and awesome productivity.

I'm also focused on **JavaScript**-related technologies: 📦 **NodeJS**, ⚡ **Vue.js**, ⚙️ **React**, etc, with Python (or not) as the backend.

Testing (and playing with) new technologies, as they come up, is something I like a lot. **Golang**, **Universal JS** apps with SSR or **Blockchain** are areas where I want to get better in the mid term.

Professional experience

Frontend developer

Capgemini (Spain)
from Jan/2020 to Mar/2020

◦ Frontend development with React ◦ Agile flow with Scrum ◦ Code review & pull requests ◦ Atlassian suite for team-work (Bitbucket, Jira, Confluence) ◦ Slack, Zoom, Skype for communication/remote work
