

León Domingo

Fullstack developer

Fullstack developer and enthusiast of **the WWW** universe for its freedom of movement. Your apps, services and content always availabe from anywhere and any device.

I'm in love with **open-source** projects which give us a great platform to create useful things with a low cost and fully transparent. (Almost) every tool I use is open source (linux, vscode, postgresql, python, and so on) and I (usually) do not like proprietary solutions (oracle, sql server, windows, etc) because of the obligation to adopt another set of private related technologies from the same company (most of the time).

I love **Python** 🐍 and the whole living ecosystem around it. Great work of a lot of people. Great on-line resources and awesome productivity.

I'm also focused on **JavaScript**-related technologies: 📦 **NodeJS**, ♥ **Vue.js**, 🦄 **React**, etc, with Python (or not) as the backend.

Testing (and playing with) new technologies, as they come up, is something I like a lot. **Golang**, **Universal JS** apps with SSR or **Blockchain** are areas where I want to get better in the mid term.

I used to work on desktop apps environment (🪟) but now I know I'll never come back; maybe with **Electron**... The WWW is the future (and the present, in fact), and we have a lot of opportunities out there.

Professional experience

Software engineer

RIDDLE&CODE (Austria)
from Feb/2017 to today

◦ Python HTTP/JSON API development using Flask and BigchainDB (Blockchain + crypto) related stuff ◦ Frontend with Vue.js and the Flask HTTP/JSON API ◦ Deployment of different services on AWS servers + Ubuntu machines ◦ Remote working (Slack + Jira + appear.in/Skype)

Cofounder / Developer

Codevince (Spain)
from Oct/2013 to May/2018

◦ Python + PostgreSQL + MongoDB backend development ◦ HTML5 + CSS3 + JS [Vue.js, AngularJS (1.X), React.js, Lodash, Axios, jQuery, ES2015, etc] frontend development ◦ Wordpress development (PHP + HTML5 + CSS3 + JS [Vue.js / AngularJS / React.js], custom themes & plugins) ◦ NodeJS (with ExpressJS) + MongoDB backend development ◦ Setting up Linux servers on several cloud providers with Ubuntu machines ◦ Combinations of the above items...

Lead developer

Ender Aplicaciones (Spain)
from Jun/2005 to Oct/2013

CTO. Analysis and development of web projects using Turbogears2 (Python + PostgreSQL + jQuery + HTML5 + CSS3) ◦ Services and application deployment on different cloud providers using Ubuntu

Education

Computer Science degree

Universidad Politécnica de Madrid
from 1996 to 2001

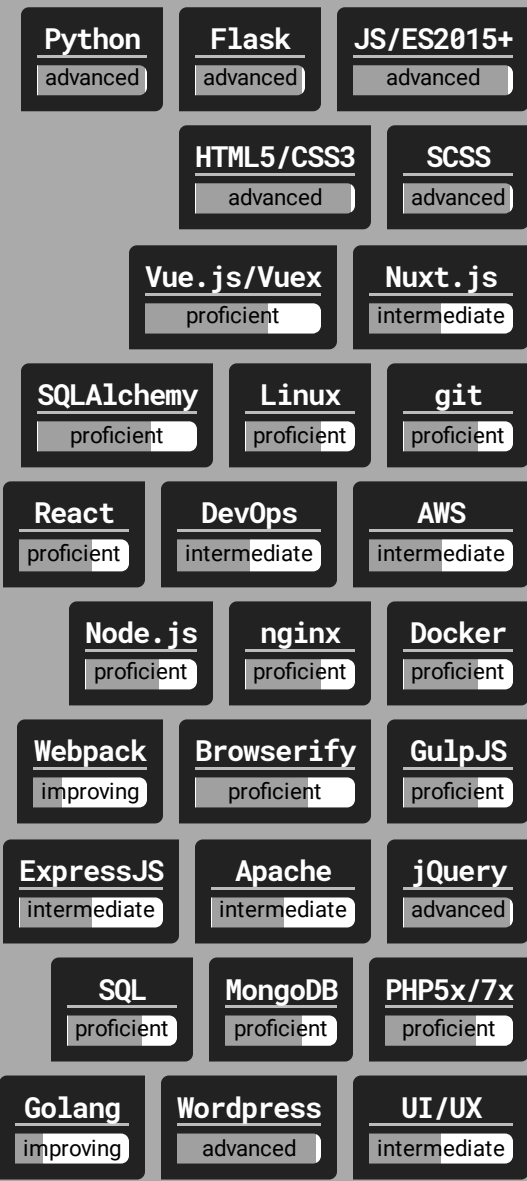

Just the period during which I acquired the theoretical foundations that would help me achieve the professional skills of "real life". I came out with no specific knowledge but I was ready to receive what it was coming.
