

# León Domingo

## Fullstack webdeveloper

Full-stack web developer and enthusiast of **the WWW** universe for its freedom of movement.

I'm in love with open-source projects which give us a great support to create useful things with a low cost. (Almost) every tool I use is open source (linux, vscode, postgresql, python, firefox, etc, etc) and I (usually) do not like proprietary solutions (oracle, sql server, windows, etc) because of the obligation to adopt another set of private related technologies from the same company (most of the time).

I **♥ Python** programming language and the whole living ecosystem around it. Great work of a lot of people. Great on-line resources and awesome performance.

I'm also focused on **JS**-related technologies: ☞ NodeJS, ♥ Vue.js, ☞ ReactJS, etc, with Python (or not) server side technologies.

Testing (and playing with) new technologies, as they come up, is something I like a lot. **Golang** or **Universal JS** apps with SSR are areas where I want to get better.

I used to work on desktop apps environment (☐) but now I know I'll never come back. The WWW is the future (and the present, in fact), and we have a lot of opportunities out there.

### Professional experience

Software engineer  
RIDDLE&CODE (Austria)  
from Feb/2017 to today

Python HTTP/JSON API development using Flask, and BigchainDB + Blockchain + crypto related stuff. Some of frontend work with Vue.js and the Flask HTTP/JSON API. Deployment of different services on AWS servers + Ubuntu machines. Remote working

Cofounder / Developer  
Codevince (Spain)  
from Oct/2013 to May/2018

Python + PostgreSQL + MongoDB backend development. HTML5 + CSS3 + JS [Vue.js, AngularJS (1.X), React.js, Lodash, Axios, jQuery, ES2015, etc] frontend development. Wordpress development (PHP + HTML5 + CSS3 + JS [Vue.js / AngularJS / React.js], custom themes & plugins). NodeJS (with ExpressJS) + MongoDB backend development. Setting up Linux servers on several cloud providers with Ubuntu machines. Combinations of the above items...

Lead developer  
Ender Aplicaciones (Spain)  
from Feb/2017 to Ene/2018

Dirección técnica de proyectos. Análisis y desarrollo de proyectos web en Turbogears2 (Python + PostgreSQL + jQuery + HTML5 + CSS3). Despliegue de servicios y aplicaciones en proveedores cloud usando máquinas Ubuntu.

### Training

Ingeniería Técnica en Informática de Gestión  
Universidad Politécnica de Madrid  
from 1996 to 2001

Just the period during which I acquired the theoretical foundations that would help me achieve the professional skills of "real life". I came out with no specific knowledge but I was ready to receive what was coming.
