León Domingo

Developer

Curious developer and enthusiast of the WWW universe, looking for a company's "mission/vision" (what they're trying to achieve and for whom) and culture (what they think about the people inside) I can feel aligned with.

I'm in love with **open-source** projects which give us a great platform to create useful things with a low cost and full transparency. (Almost) every tool I use is open source (linux, vscode, postgresql, python, and so on) and I (usually) do not like propietary solutions (oracle, sql server, windows, etc) because of the obligation to adopt another set of private related technologies from the same company (most of the time).

I love **Python** and the whole living ecosystem around it. Great work of a lot of people. Great on-line resources and awesome productivity.

I'm also focused on JavaScript-related technologies, mostly for the frontend:

React, Vue, with Python or (19) Node/Express as the backend.

Testing (and playing with) new technologies, as they come up, is something I like a lot. Golang or Blockchain are areas where I want to get better in the mid term.

Professional experience

Senior React Developer [freelance]

Tata Consultancy Services (Hungary) from Aug/2021

• Frontend development (React/JS, HTML, CSS) • GraphQL • Fully remote

Frontend Developer

Vector ITC (Spain) from Apr/2021 to Jul/2021

• Frontend development in Angular 10-12 for a big spanish bank in its UK division • Agile workflow • Code reviews & pull requests • Fully remote
