León Domingo

Developer

Curious developer and enthusiast of **the WWW** universe, looking for a company's "mission/vision" (what they're trying to achieve and for whom) and culture (what they think about their people) I can feel aligned with.

I'm in love with **open-source** projects which give us a great platform to create useful things with a low cost and full transparency. (Almost) every tool I use is open source (Linux, Python, VSCode, PostgreSQL, and so on) and I (usually) do not like propietary solutions (Oracle, SQL Server, Windows, etc) because of the obligation to adopt another set of private related technologies from the same company (most of the time).

I'm pretty focused on **JS JavaScript**-related technologies (including **Typescript**): ⚛ **React** or Ⓥ **Vue** for the front, and Ⓙ**Node/Express** for the backend.

I love ☘ **Python** and the whole living ecosystem around it. Great work of a lot of people. Great on-line resources and awesome productivity.

Testing (and playing with) new technologies, as they come up, is something I like a lot. **Golang** or **Blockchain** are areas where I want to get better in the mid term.

Professional experience

Fullstack React/Node Developer [contractor]
Infoser Technological Solutions (Spain)
<div align="right">from Jan/2022</div>

- Frontend (React, Javascript/Typescript, HTML, JSS/SCSS, Redux/Saga, MaterialUI) and Backend/Middleware (Node, Express, Javascript/Typescript, PostgreSQL and/or 3rd party APIs) development for a german multinational motor-industry company in an app for sharing BigData sources between providers and consumers (data scientists)
- Unit testing with Jest/Testing Library
