León Domingo

Developer

Curious developer and enthusiast of **the WWW** universe, looking for a company's "mission/vision" (what they're trying to achieve and for whom) and culture (what they think about the people inside) I can feel aligned with.

I'm in love with **open-source** projects which give us a great platform to create useful things with a low cost and full transparency. (Almost) every tool I use is open source (Linux, Python, VSCode, PostgreSQL, and so on) and I (usually) do not like propietary solutions (Oracle, SQL Server, Windows, etc) because of the obligation to adopt another set of private related technologies from the same company (most of the time).

I love 🐍 **Python** and the whole living ecosystem around it. Great work of a lot of people. Great on-line resources and awesome productivity.

I'm also focused on **JS** **JavaScript**-related technologies, mostly for the frontend: ⚛ **React** or **Ⅴ Vue**, with **Python** or ⑯ **Node/Express** as the backend.

Testing (and playing with) new technologies, as they come up, is something I like a lot. **Golang** or **Blockchain** are areas where I want to get better in the mid term.

- Services and application deployment on different cloud providers using Ubuntu
- Pair programming

Education

Computer Science degree
Universidad Politécnica de Madrid

from **1996** to **2001**

Just the period during which I acquired the theoretical foundations that would help me achieve the professional skills of "real life". I came out with no specific knowledge but I was ready to receive what it was coming.
