# León Domingo

## Fullstack developer

Fullstack developer and enthusiast of **the WWW** universe for its freedom of movement. Your apps, services and content always availabe from anywhere and any device.

I'm in love with **open-source** projects which give us a great platform to create useful things with a low cost and fully transparent. (Almost) every tool I use is open source (linux, vscode, postgresql, python, and so on) and I (usually) do not like propietary solutions (oracle, sql server, windows, etc) because of the obligation to adopt another set of private related technologies from the same company (most of the time).

I love **Python** 🐍 and the whole living ecosystem around it. Great work of a lot of people. Great on-line resources and awesome productivity.

I'm also focused on **JavaScript**-related technologies: ⬡ **NodeJS**, ⋁ **Vue.js**, ⚛ **React**, etc, with Python (or not) as the backend.

Testing (and playing with) new technologies, as they come up, is something I like a lot. **Golang**, **Universal JS** apps with SSR or **Blockchain** are areas where I want to get better in the mid term.

I used to work on desktop apps environment (⊞) but now I know I'll never come back; maybe with **Electron**... The WWW is the future (and the present, in fact), and we have a lot of opportunities out there.

## Professional experience

### Software engineer
RIDDLE&CODE (Austria)
from **Feb/2017** to **today**

∘ Software development of solutions based on Blockchain using Python, Flask (HTTP JSON APIs) and IPDB/BigchainDB plus others (Docker, Docker-Compose, ...) ∘ Frontend with Vue.js and the Flask HTTP/JSON API ∘ Deployment of different services on AWS servers with Ubuntu machines ∘ Remote working (Slack + Jira + whereby.com -aka appear.in- / Skype)

### Cofounder / Developer
Codevince (Spain)
from **Oct/2013** to **May/2018**

∘ Python + PostgreSQL + MongoDB backend development ∘ HTML5 + CSS3 + JS [Vue.js, AngularJS (1.X), React, ES2015+, lodash, axios, jQuery, etc] frontend development ∘ Wordpress development (PHP + HTML5 + CSS3 + JS [Vue.js / AngularJS / React], custom themes & plugins) ∘ NodeJS (with ExpressJS) + MongoDB backend development ∘ Setting up Linux servers on several cloud providers with Ubuntu machines ∘ Combinations of the above items...

### Lead developer
Ender Aplicaciones (Spain)
from **Jun/2005** to **Oct/2013**

CTO. Analysis and development of web projects using Turbogears2 (Python + PostgreSQL + jQuery + HTML5 + CSS3) ∘ Services and application deployment on different cloud providers using Ubuntu

## Education

### Computer Science degree
Universidad Politécnica de Madrid
from **1996** to **2001**

Just the period during which I acquired the theoretical foundations that would help me achieve the professional skills of "real life". I came out with no specific knowledge but I was ready to receive what it was coming.
